Subject: Shiloh Church Road Site work 9/20

Morning Chris,

[\[redacted\]](#) and myself will be mobilizing to the site on Monday (1 vehicle). I'll have the supplies needed to collect a water sample if the pastor has allowed us access to property RW11. I've talked with [\[redacted\]](#) on adding getting a new shape file layer into collector, for our tracing of the unexcavated area and I'll be doing a teams call with her to go over how it will work in the field on the iPads with a sat antenna we plug into them. While I could do this by myself I do greatly want to bring [\[redacted\]](#) up to speed and make him a valuable field asset for work that will be happening on the site. I'll also have extra zip ties with me for placing the signage back on the posts, at property three (3)
